Professional Summary

AI/ML Engineer and Data Scientist with hands-on internship experience in machine learning, deep learning, and data-driven solutions across healthcare and FinTech domains. Proficient in building end-to-end ML pipelines using Python, TensorFlow, PyTorch, and cloud platforms. **2nd Prize winner at MIT-WPU Hackathon**; IBM-certified in Machine Learning and Data Science.

Skills

Programming & Querying: Python, SQL

Machine / Deep Learning: Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV

NLP & Generative AI: NLTK, SpaCy, HuggingFace Transformers, LangChain, RAG, Prompt Engineering, OpenAI API, Gemini API

MLOps & Deployment: Docker, MLflow, AWS

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, EDA, Feature Engineering

Statistics & Mathematics: Probability, Hypothesis Testing, A/B Testing, Descriptive Statistics

Database Management: MySQL, MongoDB

Big Data: PySpark (basic), Hadoop (awareness)

Web Development: Flask, FastAPI, HTML

Other: GitHub, System Design (awareness)

Awards & Certifications

- **Medico Engino Hackathon – MIT World Peace University, Pune (2024): Secured 2nd Prize** in a healthcare innovation hackathon organized in collaboration with Dassault Systèmes.
- **IBM Machine Learning Professional Certificate – Coursera (2024):** Completed hands-on training in supervised and unsupervised learning, model evaluation, and Python-based ML workflows.
- **IBM Data Science Professional Certificate – Coursera (2024):** Gained practical experience in data analysis, visualization, SQL, and applied machine learning through real-world projects.

Experience

AI and Data Science Consultant Intern

Jun 2025 – Feb 2026

Rubix.e.AI, Bangalore – Hybrid

Python, SQL, Pandas, NumPy, Machine Learning

- Contributed to a live **FinTech project**, supporting data analysis, feature engineering, and ML model development aligned with business objectives.
- Handled end-to-end data cleaning, preprocessing, and validation to ensure high-quality datasets for ML workflows.
- Performed feature engineering and dataset preparation, improving model-ready data quality across multiple pipelines.
- Applied Python-based analysis techniques to derive actionable insights and collaborated cross-functionally with team members.

Python Developer Intern

Jul 2024 – Oct 2024

Arohi Software, Pune – Remote

Python, Flask, HTML, CSS, SQL

- Developed a Flask-based web application implementing backend logic, routing, and database integration.
- Worked on debugging, testing, and optimizing Python code to improve application performance.

Projects

Diabetic Readmission Prediction using Federated Learning | Python, XGBoost, Federated Learning

- Developed a privacy-preserving federated learning system to predict diabetic patient readmission across multiple hospital nodes without sharing raw patient data.
- Performed data preprocessing, categorical encoding, and SMOTE-based class-imbalance handling on healthcare datasets.
- Applied federated averaging to combine local XGBoost models; global federated model achieved **~79% accuracy** vs. 74–75% for local models and **AUC-ROC (Macro, OvR): 0.8761**, significantly outperforming non-federated baselines.

- Demonstrated that federated models maintain full patient data privacy while achieving reliable and robust readmission predictions.

RAG Chatbot | *Rag, LangChain, AWS, FastAPI, Streamlit*

Feb 2025 – Mar 2025

- Built an end-to-end RAG chatbot with LangChain for document-grounded Q&A.
- Deployed on AWS free tier (EC2, API Gateway) with zero infrastructure cost.
- Improved user experience with conversation memory, streaming responses, and multi-format ingestion.

Education

Faculty of Engineering & Technology, DMIHER (DU)

2022 – 2026

B.Tech in Artificial Intelligence & Machine Learning

Wardha, Maharashtra

Dr. B.R. Ambedkar Jr. College

2021 – 2022

HSC

Hinganghat, Maharashtra

Adarsh Vidyalaya

2019 – 2020

SSC

Sakhara, Maharashtra
